PROJECTS

▪ Student Database Management System

This is a full-stack web application that allows users to register, login, and manage student information efficiently. The system enables users to add, view, edit, and delete student records, along with features like filtering students by age or course . This project demonstrates skills in CRUD operations, user authentication, API integration, and frontend-backend connectivity, making it a practical application for managing academic data.

Technologies Used : React , TypeScript , Tailwind CSS , Flask , MongoDB.

▪ Portfolio Website

A personal portfolio showcasing my skills, projects, and certifications. Built with React, TypeScript, and Tailwind CSS, and hosted on Netlify. Designed to be fully responsive and visually engaging, highlighting my full-stack development capabilities.

Technologies Used : React , TypeScript , Tailwind CSS , Netlify.

▪ **Chemical Today — B2B Chemical Industry Platform**

A full-featured website developed for the chemical industry, providing company profiles, market insights, and chemical product listings. Built to help manufacturers and suppliers showcase their products and connect with clients.

Technologies Used : React , Tailwind CSS ,Tailwind CSS , Flask , MongoDB .

▪ **Real Time Tracking and SOS System using IOT**

The core objective of the project is Multipurpose GPS Tracking Device that extends its capabilities to address critical societal needs. Specifically, it serves as a medication reminder system for the elderly, a strategic asset for military operations, and a reliable emergency response tool for the safety of girl children. And it has multiple features in-built.

Technologies Used : Embedded Systems , Arduino Uno.
